

# Dish Detergent

---

A dish detergent professional supplier, *Wash & Wash*, maintains a spreadsheet with a list of sold products in their stores.

During this study you are the person responsible for maintaining this spreadsheet. This means you should edit the spreadsheet to fully complete the tasks.

The stores just reported this week's sales.

## **Task 1:**

**Add the new dish detergent sales to the spreadsheet. The new sales are the next pages. Do not change the old sales during this task!!**

*Ensure that no information is left out of the spreadsheet! For data in the forms that doesn't have a corresponding spreadsheet column, you should add a new column and insert the data.*

The last person who edited the spreadsheet added a few errors.

**Task 2:** *Fix these errors in the spreadsheet:*

- The description of the product with upc **1111143002** is wrong. The correct description is **SUNLIGHT GEL**;
- The **size** of product with upc 1111140009 is **45**, not 42;
- The **price** of the product with upc 1111147006 in store 101 during all weeks was **2.99**.

In order to keep their customers happy and improve the service, *Wash & Wash* keeps track of various statistics.

**Task 3:** *In the worksheet "statistics" there are some tables to fill in. Fill those tables with the correct numbers. Some of the tables may require a calculation of values in the spreadsheet. If you need, you can calculate these values in the spreadsheet.*

### New Sale Information 1

Store: \_\_\_\_\_ Week: \_\_\_\_\_

Qty: \_\_\_\_\_ Price: \_\_\_\_\_ Profit: \_\_\_\_\_

On sale: \_\_\_\_\_ Discount: \_\_\_\_\_
